

Code Red

If you want weather related warnings you must go online and sign-up.

We have updated the system so that calls are initiated by the national weather service. You will only get calls if it affects your area of the county. You can check the boxes for tornados, severe thunderstorms or flash floods. You can pick and choose which warnings you want to receive. This system prevents you from getting calls when it only affects other parts of the county.

Even if you have previously signed in, you must re-enter the system and sign up for the weather warnings you want to receive.

Go to www.moultriecountyil.com , www.moultriesheriff.com , or www.one-eleven.net and click on the CodeRed link.

Make sure and check the map for the location of your house. If it is not correct you can click and drag the marker to the correct location.

If you have any problems or questions call the Moultrie County Emergency Services Office at 728-8841 or 728-7922.
